Trust Think Products Digital Ally and Trust Think Products Begin Distribution of new Disease Deterrent Line including Hand & Body Sanitizer, Disinfectant, Thermoscanners & More to Overwhelming Response

De Soto, KS – [Trust Think Products](#) and [Digital Ally](#), headquartered in Lenexa, KS announced today that their new product line of products has already sold out the first inventory, and pre-orders are being taken for the [Shield Sanitizer Lotion](#), an FDA approved alcohol-free sanitizer lotion, [Shield Disinfectant Sanitizer](#), a USDA and EPA-approved disinfectant spray and [ThermoVu](#) a non-contact temperature measuring instrument that measures temperature via the wrist. The device provides an abnormal temperature alarm and counting features – and is mounted on a pole with adjustable heights.

One of the benefits of [ThermoVu](#) is that employees do not have to take the visitor's temperature; they scan themselves. Thus, entry can be prevented for employees and guests immediately protecting the safety of all involved, without being within six feet of the scanned person.

[The Shield Sanitizer Lotion](#) is an alcohol-free, non-drying sanitizer that is safe for the entire family and is FDA-approved.

[Shield Disinfectant Sanitizer](#) is a powerful antimicrobial fluid for use across a broad spectrum of applications. The Shield product line offers disinfection, sanitizing and deodorizing solutions for many industries and has shown to be effective over many years of use. It is effective over a broad range of viruses and bacteria such as the coronavirus, MRSA, HIV, Listeria, Influenza A, Hepatitis C and Salmonella, among many others.

You can find more about individual products here:

<https://www.trustthinkproducts.com/thermovu/>

The companies are still in production and distribution planning for both masks and an electrostatic sprayer, which should be available late summer.

“COVID-19 has set a new bar for sanitizing and safety in the workplace and at home,” states CEO Joe Bisogno. “We are proud to be a part of ensuring that people are safe, whether in manufacturing facilities, restaurants, schools, hospitals, offices or at their residences, and we have been gratified and overwhelmed to the response of this product line launch.”

“Of special note, we are really proud to be supplying this product line to our first responders and hospitals, who are facing unprecedented challenges in today’s environment,” adds Stan Ross, CEO of Digital Ally, Inc.
