## **Trust Think Products Signs Preferred Distribution Agreement with Digital Ally Product Line Includes: Hand & Body Sanitizer, Disinfectant, Thermoscanners, Electrostatic Sprayers, Masks & More**

---

De Soto, KS – [Trust Think Products](#) announced today a partnership to distribute a new line of Sanitizer and safety products amidst an ongoing pandemic. The Shield line includes an FDA approved alcohol-free sanitizer lotion for the entire body that softens skin while shielding the user from bacteria, a USDA and EPA-approved disinfectant spray for surface cleaning and sanitizing, thermoscanners, masks and electrostatic sprayers with several other products in the R & D pipeline.

“Our company is proud to be a part of providing safe, quality products to help fight disease and contamination, especially during the trying times of COVID-19,” states CEO Joe Bisogno. “It’s also fantastic to offer this nationwide with a local partner company that’s right down the road from us.”

The Trust Think and Digital Ally teams are excited to provide support in particular to first responders and their communities. The two companies are offering ThermaVu, a non-contact temperature measuring instrument that measures wrist temperature prior to facility entry. It provides an abnormal temperature alarm and counting features, and it is mounted on an adjustable pole. Thus, before admission, every individual has had his/her temperature checked.

Additionally, facilities will be able to secure an electrostatic sprayer, which allows disinfectant molecules to cling on, around and under all objects in a room; the disinfectant can also be used to clean and sanitize all surfaces. The sprayer is in production and should be out by late summer.

The products have broad applications and are food-safe for schools, restaurants, offices, the food industry, manufacturing, airports/airlines and others as well. They also can be used in everyday household applications.

-more-

Stan Ross, CEO of Digital Ally, Inc., states, “Amid the coronavirus pandemic, we have partnered with Trust Think Products to provide not only first responders, but all industries with vital disinfecting products that they can trust to provide defenses against the spread of the coronavirus disease as well as many others. Our ultimate goal is to provide not only first responders but all entities with the safest working space possible during this time, and we are confident this partnership with Trust Think Products will help achieve this goal.”

The Shield Hand & Body Sanitizer is an alcohol-free, non-drying sanitizer that is safe for the entire family. The Shield Disinfectant is a one-step disinfectant cleaner designed for cleaning and disinfecting hard, non-porous environmental surfaces in healthcare facilities. Shield has demonstrated effectiveness against viruses similar to SARS-CoV-2 on hard porous and/or non-porous surfaces and has been listed on the EPA’s List N: Disinfectants for Use Against SARS-CoV-2, the virus that causes the novel COVID-19 disease also known as the coronavirus.

Shield is a powerful antimicrobial fluid for use across a broad spectrum of applications. The Shield product line offers disinfecting, sanitizing and deodorizing solutions for many industries and has shown to be effective over many years of use. It is effective over a broad range of viruses and bacteria such as the coronavirus, MRSA, HIV, Listeria, Influenza A, Hepatitis C and Salmonella, among many others.
